

ADEGBOLA

ABDULBAQEE

FULLSTACK SOFTWARE
DEVELOPER

• PROFILE

As a dedicated full-stack developer, I specialize in creating dynamic and efficient digital solutions for both web and mobile platforms. My diverse skill set spans web technologies like PHP and JavaScript, as well as mobile app development using React Native and Kivy. This versatility allows me to take projects from concept to completion, delivering high-quality results every step of the way.

EDUCATION

Federal University of Agriculture Abeokuta, Nigeria (B. Engineering)

August 2024 - Present

Currently majoring in Mechatronics Engineering as an undergrad

Advanced Breed Comprehensive College

2018 - 2024

Graduated as one of the most outstanding students, was a student rep on health services and graduated with an A grade.

WORK EXPERIENCE

Google Developer Groups on Campus (GDGoC) FUNAAB – Backend Lead

Sept 2025 – Present

I lead backend development initiatives, mentor student developers, and manage API integrations for projects using PHP, Node.js, and Python. I also organize workshops and promote best practices in version control, clean code, and API security.

Genesis360 – Mobile App Engineer

July 2025– Present

At Genesis360, a food tech startup in Nigeria. I design, build and maintain React Native mobile features of the app, ensuring optimal performance, cross-platform responsiveness, and seamless user experience. I integrate with back-end services, manage state, handle offline support / error states, and apply best practices for clean code and component reuse. I collaborate with designers, QA, and backend developers to ship new modules and fix issues, aiming to boost user satisfaction and lower crash rates. I contribute to improving build pipelines, testing, and internal tools to help accelerate delivery and maintain quality.

Reapvest – Full Stack Developer, CTO and Co-Founder

Jan 2025 – Present

I help build and maintain Reapvest — a digital platform for savings, agro and non-agro investments, and a farming marketplace. I work across the full stack to deliver a smooth and secure user experience. I also played a key role in developing the platform's automated and smart savings system, helping users save and invest more efficiently. I also lead a team of developers and designers in the tech department.

Netwiver Technologies - Lead Web Developer

Aug 2024 – Present

Led technical strategy and development across web, app, and other technology domains.

- Directed the successful execution and timely delivery of key projects, ensuring innovation and high-quality standards.
- Mentored and guided a team of developers in solving complex technical challenges.
- Collaborated closely with the Product Manager to align development with business goals and objectives.
- Ensured scalability of the technology stack and maintained strict code quality and security standards.
- Spearheaded the development and optimization of the company's web platform for enhanced functionality, security, and performance.

- Designed and implemented web architecture, seamlessly integrating with other technologies and backend systems.
- Worked with cross-functional teams, including designers and backend developers, to deliver an optimal user experience.
- Continually maintained and enhanced the web platform to meet evolving business needs.

BaqDev - Software Developer (Freelancing)

Jan 2023 – June 2025

Developed websites for different Nigerian brands during summer.

Explora Social - PHP Web Developer

Feb 2020 – June 2024

Developed a small social network in high school that connected about 1,500 Africans.
